TECHNICAL SKILLS

- Languages: JavaScript, Java, Python, SQL, HTML5, CSS3, Bash
- Frameworks & Libraries: React, Next.js, Node.js, Express
- Databases & Tools: PostgreSQL, Git, GitHub, VS Code, Linux CLI, Chrome DevTools

EDUCATION

Sheridan College — Software Development and Network Engineering (SDNE) September 2025 – Present
Relevant Coursework: Object-Oriented Programming (Java), Web Development, Database Management (SQL)

PROJECTS

Souschef — AI Recipe Application (BearHacks 2026) April 2026

- Led full-stack engineering across a 4-person team to deliver a working prototype in 36 hours.
- Built the frontend interface using React and Next.js, integrating the Gemini API to parse recipes into guided steps.
- Developed REST backend endpoints with Node.js and Express connected to a PostgreSQL database.
- Configured automated audio workflows to support hands-free voice-guided cooking navigation.

Dynamic Wine Catalogue Web Application Personal Project

- Built a responsive web tool to index, filter, and search structured beverage data.
- Structured relational database schemas using SQL and handled data persistence across API requests.
- Wrote client-side filtering logic with JavaScript to minimize redundant server requests.

Portfolio Website — marcus.podnar.ca Personal Project

- Developed a responsive personal site from scratch using vanilla HTML5, CSS3, and JavaScript.
- Deployed site on a Debian Linux virtual machine, automating version deployment through Git.

Self-Hosted Development & Staging Server Personal Infrastructure Project Personal Project

- Configured a local Proxmox VE server to isolate dev, test, and production web application environments.
- Managed PostgreSQL database instances and automated local application deployments via Git and Bash scripts.
- Routed API traffic and front-end builds using Nginx reverse proxying for real-world web delivery.

EXPERIENCE

TransferEASE Relocation Inc Brokerage — IT Support Contractor May 2023 – Present

- Configured desktop hardware, operating system environments, and peripherals for client workstations.
- Diagnosed system and connectivity issues, applying structured hardware troubleshooting to restore service.

Giant Tiger — Grocery Clerk / Cashier September 2024 – Present

- Operate point-of-sale terminals accurately in high-volume retail conditions.
- Identify and correct inventory count discrepancies to support store replenishment workflows.
