TECHNICAL SKILLS

- Security & Network Access: Wireshark, Tailscale Private Mesh VPN, Access Control, Reverse Proxy Security, DNS Isolation Operating
- Systems & Hardening: Debian Linux, Proxmox VE, TrueNAS, Linux CLI, File Permissions
- Scripting & Auditing: Bash Shell Scripting, Python, Git, Systemd Journal Logs
- Application Security Fundamentals: Parameterized Queries, Secret Management, SSL/TLS, API Security

---

EDUCATION

Sheridan College — Software Development and Network Engineering (SDNE) September 2025 – Present
Relevant Coursework: Network Protocols, Information Security Principles, Linux System Security

---

SECURITY & INFRASTRUCTURE PROJECTS

Hardened Virtual Server Infrastructure

- Dell PowerEdge T320 Proxmox Environment
- Configured an isolated virtualization environment on Proxmox VE to separate testing and service networks.
- Enforced least-privilege permission models across individual Debian and TrueNAS virtual machines.
- Eliminated public open port exposure by routing all management traffic through an encrypted Tailscale mesh VPN.
- Deployed Nginx Proxy Manager to manage SSL/TLS encryption and restrict direct internal exposure.
- Automated Server Auditing and Maintenance

Personal Project

- Wrote custom Bash scripts to automate routine security patches, software updates, and system health checks.
- Reviewed systemd journal logs to audit running services and identify unauthorized access attempts.

Souschef AI Application — Secure API Implementation (BearHacks 2026) April 2026

- Secured external Gemini API credentials and application keys using environment variable configurations.
- Implemented parameterized SQL queries in PostgreSQL and Node.js to prevent SQL injection risks.

EXPERIENCE

TransferEASE Relocation Inc Brokerage — IT Support Contractor May 2023 – Present

- Deployed Windows desktop workstations, monitors, and network peripherals for staff operations.
- Troubleshooted hardware failures, unauthorized physical devices, and cable routing.
- Enforced workstation security best practices during device provisioning and local hardware rollouts.

Giant Tiger — Grocery Clerk / POS Operator September 2024 – Present

- Monitor self-checkout stations to verify item transactions, mitigate stock loss, and uphold register integrity.
- Follow corporate operational protocols for inventory handling and cash management.
